

Git Flow

The Complete Team Workflow

-  main: Production-ready code, always deployable
-  develop: Integration branch, all features merged here first
-  feature/*: Per-feature branches, created from develop
-  release/*: Prepare for production, bug fixes only
-  hotfix/*: Emergency fixes from production, branched from main

Key Commands

```
git flow init
git flow feature start NAME
git flow feature finish NAME
git flow release start VERSION
git flow hotfix start VERSION
```
